MEDICAL CATALOG

2026 EDITION

PLANT BASED IN FLEURIEUX NEAR THE A89 MOTORWAY IN FRANCE

ABOUT US

Created in 1996 and based near Lyon (Rhône Alps - France) on a key crossroad location, DIMATEX is a medium-sized company specialized in technical textiles.

We develop, produce and commercialize textile equipment (cases, covers, bags, rescue belts, fall protection belts, etc.) suited for professionals of various sectors of activity such as airline, medical, defense or rescue.

The company has its own engineering, sampling, textile confection and after sales services.

Its size allows one-off as well as large productions for defense and industry markets for examples.

Our in-house storage platform and our logistic organization allow us to offer flexible and responsive delivery conditions: immediate, periodic, cyclical and dispatched deliveries.

SALES REPRESENTATIVES IN THE FIELD

DIMATEX - Close to its customers.

Our technical sales representatives are present in the field.

Do not hesitate to contact us: we will be happy to visit you anywhere or redirect you to an official reseller.

DIMATEX provides you with R&D, prototyping and industrialization resources to develop your products.

Our design office

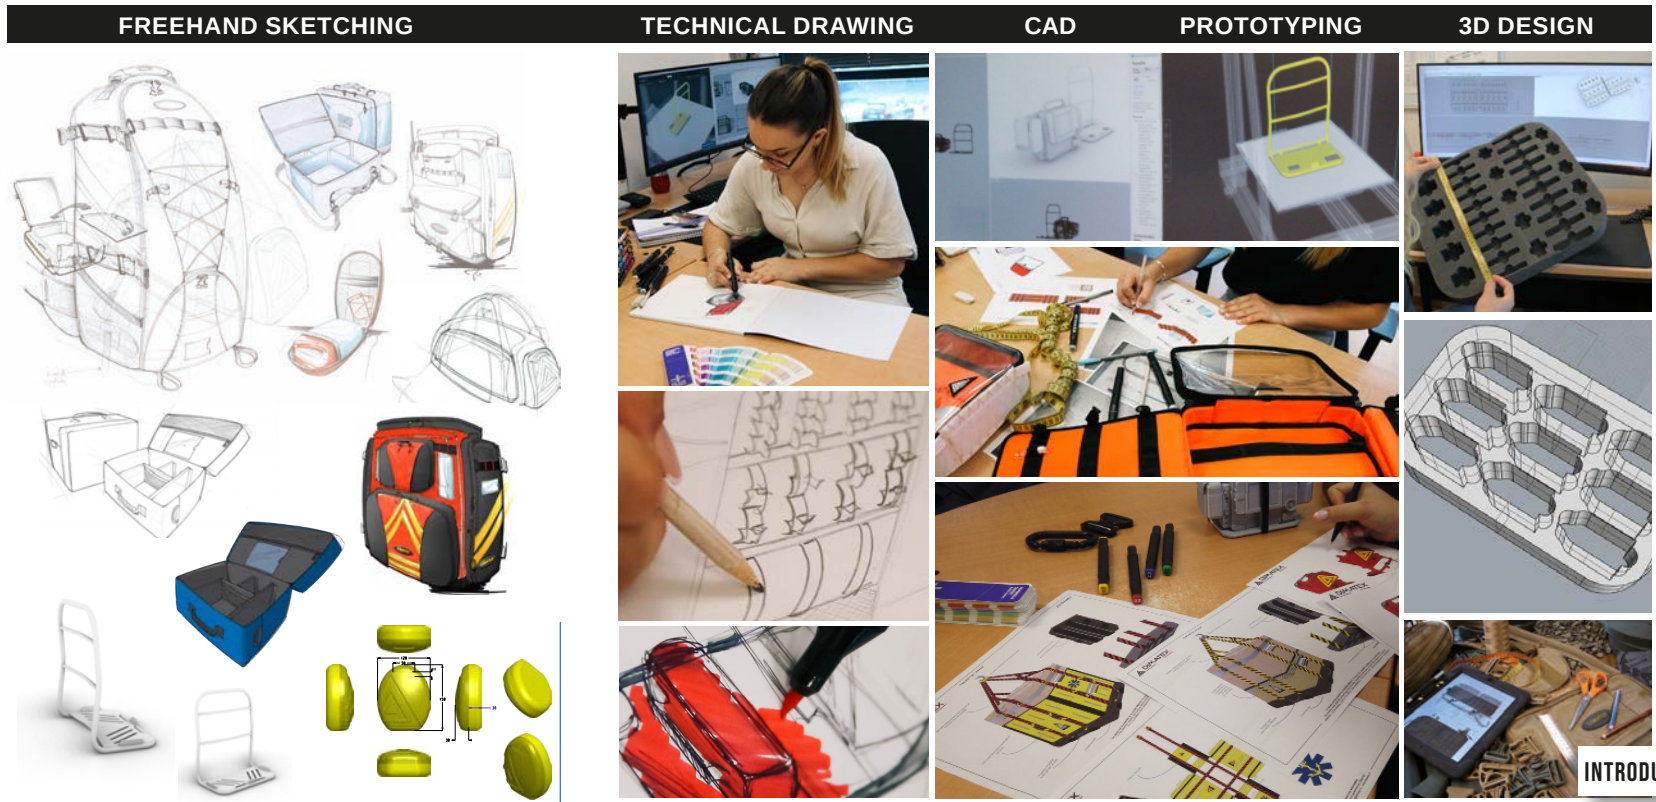

Thanks to traditional drawings and computer-aided design (CAD), we can precisely put into image your ideas.

Our sampling workshop

Our model-makers create a functional prototype identical in every respect to the production version for real-life conditions testing.

Several production sites

We can produce from one to several thousands of pieces.

AFTER-SALES SERVICE

DIMATEX offers a tailor-made after-sales service.

Specialized seamstresses are at your disposal to carry out all types of repairs on DIMATEX products as well as on products from other manufacturers that do not offer after-sales services.

During the warranty period, repairs are carried out free of charge under normal use.

Outside the warranty period, we will send you a detailed quotation, including all costs on repairs to be carried out. The work only begins with your agreement, once we have received the accepted and signed quotation.

We maintain a large stock of spare parts and raw materials identical to those used in production, ensuring that your product is repaired using original parts.
