DIMATEX

N°28

LAW ENFORCEMENT CATALOG

FACTORY BASED IN FLEURIEUX NEAR THE A89

WHO ARE WE?

Founded in 1996 and located on the outskirts of Greater Lyon at a strategic motorway junction, DIMATEX is an SME specializing in technical fabrics. The company designs, manufactures, and markets textile equipment (cases, covers, briefcases, bags, fall arrest belts, high-visibility vests, etc.) exclusively for professionals in sectors as varied as aeronautics, medicine, defense, law enforcement, and emergency services.

The company has a design office, a sampling department, a manufacturing workshop, and an integrated after-sales service. Our flexibility as an SME allows us to produce both single items and large series for the military and industrial markets.

Our on-site storage capacity and logistics organization enable us to offer flexibility and responsiveness in our deliveries: immediate, staggered, dispatched...

SALES REPRESENTATIVES IN THE FIELD

DIMATEX is close to its customers.

Our technical sales representatives visit you on site to better understand your needs and constraints.

Please do not hesitate to contact us. We travel throughout mainland France, the French overseas departments and territories, and abroad to advise you and present our latest products.

DIMATEX provides you with research and development, prototyping, and industrialization resources to develop your products.

Our design office

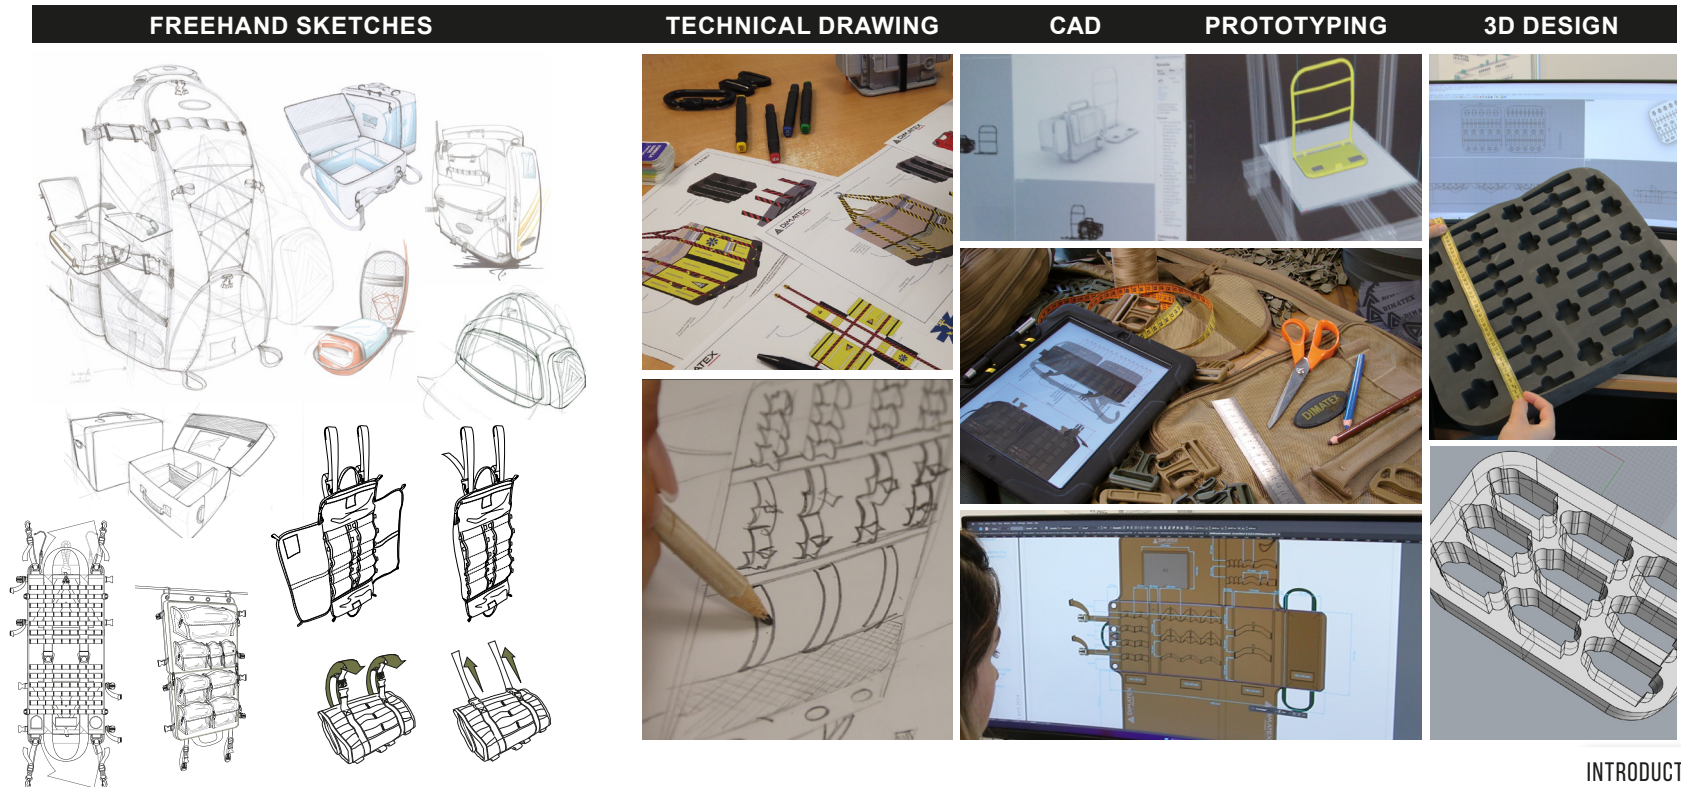

Using traditional drawings and computer-aided design (CAD), we accurately visualize your ideas.

Our sampling workshop

Our model makers produce a functional prototype that is identical in every way to the production model for testing under real-life conditions.

Several production sites

We can produce from one to several thousand pieces.

AFTER-SALES SERVICE

DIMATEX offers a customized after-sales service.

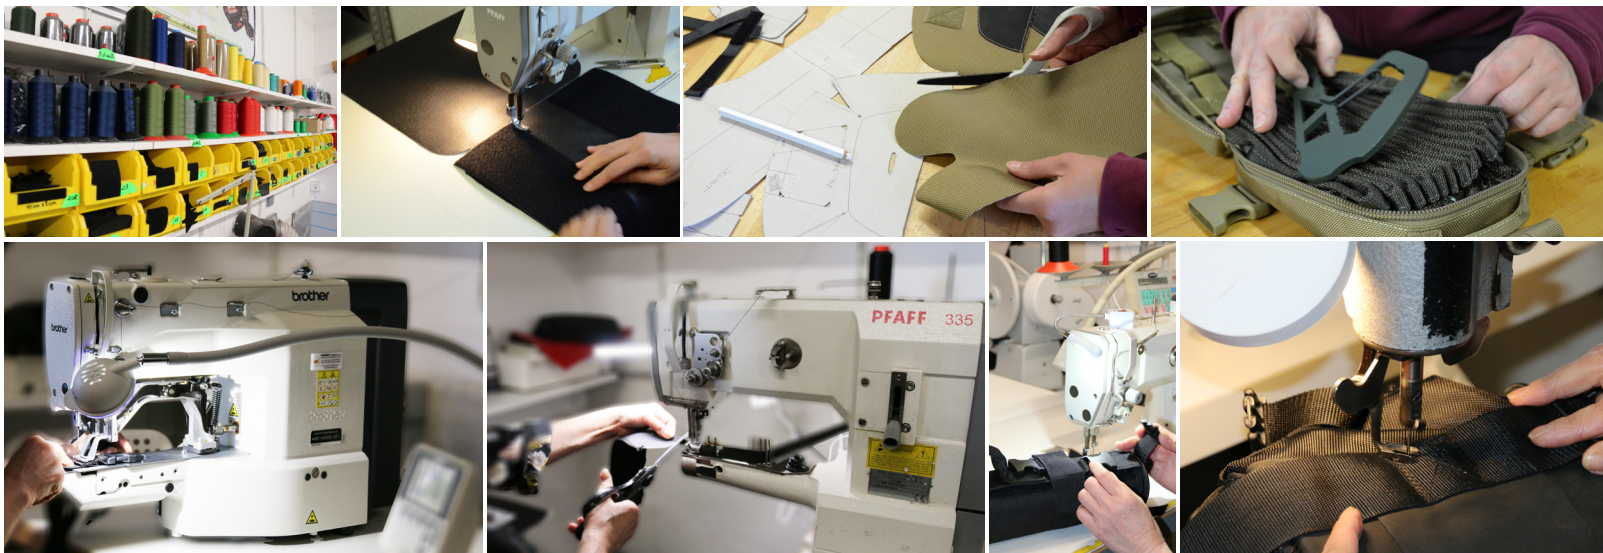

Specialized seamstresses are at your service to carry out all types of repairs on products from the DIMATEX range, but also on products from our competitors who do not offer after-sales service.

During the warranty period and under normal use of the products, repairs are carried out free of charge. Outside the warranty period, we will send you a detailed quote listing all the repairs to be carried out.

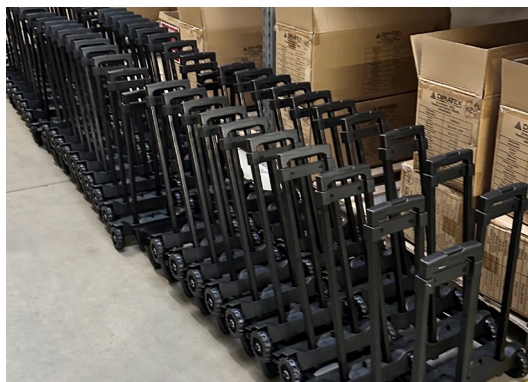

Work will only begin with your approval, after we have received your signed and accepted quote.

We have a large stock of spare parts and raw materials that are identical in every way to those used in production. This means that your product will be repaired with original parts.
